

MOTOROLA

Programming Cable RKN4075

Professional Radio

Accessories

GENERAL INFORMATION

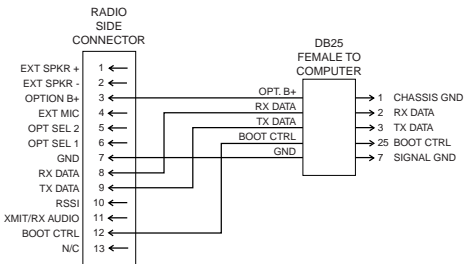

The RKN4075 Programming Cable provides the interface between a computer and a portable radio for programming with Radio Service Software. An adapter is supplied which converts the DB25 to a DB9 connector for interfacing to a computer with DB9 ports.

Note: The Programming Cable does **not** require a Radio Interface Box (RIB), e.g., RLN4008.

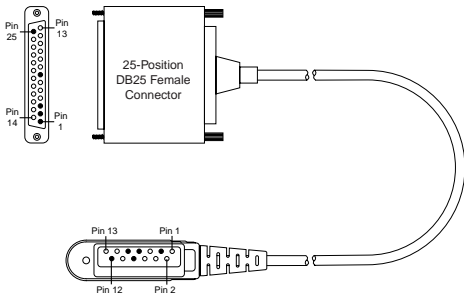

SERVICE

The RKN4075 Programming Cable is not repairable. Order a replacement cable as necessary.
